

MOHAMED NIHMATHULLAH S

Data Analyst | SQL · Python · Power BI

Kilakarai, Tamil Nadu, India | +91 88259 07526 | nihmathuu@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Languages: English, Tamil

PROFESSIONAL SUMMARY

B.Tech Information Technology student (Class of 2028, CGPA 8.24) with hands-on data analytics experience across SQL, Python, and Power BI. Built end-to-end analytics pipelines on 3,000+ records, cutting data inconsistencies by 99% through systematic data cleaning, ETL, and validation. Seeking a Data Analyst internship to apply data visualization, business intelligence, and data-driven decision-making skills to real business problems.

SKILLS

Programming & Databases:

Python (Pandas, NumPy), SQL, MySQL, Data Cleaning, ETL

BI & Visualization: Power BI (DAX, Power Query, Data Modeling), Tableau, Microsoft Excel (Pivot Tables, VLOOKUP), KPI Dashboards

Analytical & Tools: Exploratory Data Analysis (EDA), Statistical Analysis, Data Storytelling, Data Modeling, Git/GitHub

PROJECTS

E-Commerce Data Analysis | [GitHub](#)

- Reduced data inconsistencies by 99% across 3,000+ e-commerce records by designing a 6-table relational MySQL database and executing a full Python (Pandas) ETL workflow, verified through post-cleaning validation checks.
- Delivered sales, customer, and product insights across 8 business areas by writing 30+ SQL queries using joins, aggregations, and GROUP BY logic against the relational database.
- Built interactive Power BI dashboards with DAX measures, drill-through pages, and cross-filtering to surface business-ready KPIs for stakeholder review.

Customer Behavior Data Analysis | [GitHub](#)

- Identified key behavioral and purchasing patterns across ~50 customer records by extracting and aggregating data with SQL and performing exploratory data analysis (EDA) in Python.
- Surfaced actionable customer segments and purchase trends by designing Power BI visuals and translating findings for non-technical stakeholders, driving dashboard adoption for decision-making.

EXPERIENCE

Data Analytics & Forensic Technology Job Simulation — Deloitte Australia (Forage)

Remote — Virtual Job Simulation | Jul 2026

- Built an interactive Tableau dashboard to visualize a client's telemetry dataset across a 2-task simulation, improving clarity of insights presented to stakeholders through end-to-end data analysis and dashboard design.
- Classified payroll data by adding 1 new classification column across the client's full Excel dataset, verified for accuracy, to support the audit team's pay-equity data analysis.

Data Visualization: Empowering Business with Effective Insights — Forage Job Simulation

Remote — Virtual Job Simulation | Jul 2026

- Anticipated business-critical questions for 2 senior executives (CEO and CMO) by drafting a targeted question set ahead of a stakeholder meeting, quantified by relevance to leadership priorities.
- Presented leadership-ready visuals across a 3-task simulation by selecting optimal chart types and building visuals in Tableau and Power BI, confirmed against CEO and CMO requirements.

EDUCATION

B.Tech, Information Technology

2024 – 2028

Mohamed Sathak Engineering College, Kilakarai, Tamil Nadu | CGPA: 8.24

- Relevant Coursework: Database Management Systems, Data Structures & Algorithms, Statistics, Object-Oriented Programming

CERTIFICATIONS

- Data Analytics — Novitech (2026)
- Power BI — Novitech (2026)
- Programming with Python 3.x — Simplilearn (2025)
